

**National Interagency Coordination Center  
Incident Management Situation Report  
Tuesday July 30, 2013 – 0530 MT  
National Preparedness Level 3**

**National Fire Activity**

Initial attack activity:	Light (88 new fires)
New large fires:	4 (*)
Large fires contained:	5
Uncontained large fires: **	24
Area Command Teams committed:	0
NIMOs committed:	0
Type 1 IMTs committed:	2
Type 2 IMTs committed:	14

\*\* Uncontained large fires include only fires being managed under a full suppression strategy.

[Link](#) to Geographic Area daily reports.

One MAFFS C-130 aircraft from the 145<sup>th</sup> Airlift Wing, Charlotte (North Carolina Air National Guard), and one from the 153<sup>rd</sup> Airlift Wing, Cheyenne (Wyoming Air National Guard), are supporting wildland fire suppression operations out of Boise, ID.

**Northwest Area (PL 4)**

New fires:	5
New large fires:	2
Uncontained large fires:	9
Type 1 IMTs committed:	1
Type 2 IMTs committed:	6

**Douglas Complex**, Oregon DOF. IMT 2 (Sifford). Seven miles north of Glendale, OR. Timber and brush. Extreme fire behavior with crown runs and long-range spotting. Numerous structures and a communication site threatened. Evacuations and road closures in effect.

**Mile Marker 28**, Yakama Agency, BIA. IMT 2 (Rabe). Fifteen miles northeast of Goldendale, WA. Timber, brush and grass. Active fire behavior. Numerous structures and power lines threatened. Evacuations have been lifted. Road closures in effect.

**Colockum Tarps**, Southeast Region, Washington DNR. IMT 2 (Nickey). Six miles southeast of Malaga, WA. Timber and grass. Running fire with isolated single tree torching. Residences threatened. Evacuations in effect.

**Whiskey Complex** (three fires), Umpqua NF. IMT 2 (Williams). Six miles east of Tiller, OR. Timber, brush and grass. Active fire behavior with occasional torching and spotting. Structures threatened. Evacuations and area closures in effect

\* **Brimestone**, Grants Pass Unit, Oregon DOF. IMT 2 (Thorpe). Ten miles northwest of Merlin, OR. Timber. Moderate fire behavior with torching and spotting. Residences threatened.

\* **Big Windy Complex** (two fires), Grants Pass Unit, Oregon DOF. IMT 1 (Schulte). Twenty-five miles northwest of Grants Pass, OR. Timber. Active fire behavior with group torching and short-range spotting. Structures threatened. Road and area closures in effect.

**Labrador**, Rogue River-Siskiyou NF. IMT 2 (Fillis). Thirteen miles northwest of Cave Junction, OR. Timber and brush. Active fire behavior. Structures threatened.

**Predictive Services Discussion:** Widely scattered showers and thunderstorms will form over the Rockies and parts of the northern Plains. Breezy conditions will develop over the northern Rockies and the northern Great Basin. In the East, thunderstorms will move through the mid-Mississippi and Ohio Valleys. Temperatures will begin to rise over much of the West. Mild conditions will continue from the northern Rockies to the mid-Mississippi Valley and the Northeast. Very warm and humid conditions will continue in the South.

<http://www.predictiveservices.nifc.gov/outlooks/outlooks.htm>

## WILDLAND/URBAN INTERFACE -- STRUCTURE PROTECTION

*Wildland / Urban Interface Category*

The primary consideration of any operation is to assure firefighter and public safety. It is a must to assess potential fire behavior, ingress/egress routes, nature of the threat, hazardous materials, and available water supplies before engaging in the protection of any structure.

- Factors that may make an attempt to save a structure hopeless or too dangerous include:
  - The fire is making a sustained run and there is little or no clearance between the structure and the fuel.
  - The fire behavior is extreme; spot fires are numerous and the spread is outpacing containment.
  - Water supply will not last as long as the threat of the fire.
  - The fire intensity dictates that you leave the fire area immediately.
  - The structure is constructed of wood and has a wood, shake roof.
  - The roof of the structure is more than one-quarter involved.
  - There is fire inside of the structure or windows are broken and there is no way to quickly repair them.
  - You cannot safely remain at the structure because your escape route could become unusable
  
- When implementing a plan to protect structures, consider the following:
  - Do not enter a burning structure unless you are trained, equipped, and authorized. Firefighter safety and survival is the number one priority.
  - Always stay mobile and wear all of your PPE.
  - Back in equipment to allow for a quick escape.
  - Coil a short, charged line with fog nozzle on your engine for safety and quick knock down capability.
  - Don't make long hose lays. Keep at least 100 gallons of water reserve in your tank.
  - Check the road system before the fire approaches. Know bridge limits, alternate access routes, and turnarounds for your vehicle and other support vehicles.
  - Determine if residents are home. Leave on the inside and outside lights, regardless of the time of day. Close the garage door.
  - Place the owners' ladder at a corner of the home on the side with the least fire threat.
  - Coil and charge garden hoses.
  - Check and mark hazmat; e.g., LPG, pesticides, and paint storage.
